RED HAT CERTIFIED ARCHITECT

Red Hat Certified Engineers (RHCEs) seeking to demonstrate greater depth and breadth of knowledge and skills in Red Hat Enterprise Linux and across other Red Hat products can benefit from the Red Hat® Certified Architect (RHCA) credential.

A Red Hat® Certified Architect (RHCA) has attained the highest level of certification by passing and keeping current a RHCE certification and five additional Red Hat certifications chosen from the system administrator lists.

A higher level of RHCA credential can be attained by earning more than five credentials beyond the base credentials. For example, earning six credentials beyond RHCE earns an RHCA Level II designation as long as the six credentials remain current.

RHCE + 5 Red Hat certifications

RHCA Level I

RHCE + 6 Red Hat certifications
