

THE WORLD OF AWS

With the accelerating adoption of cloud computing and the AWS Cloud around the world, organisations are increasingly seeking ways to identify individuals with demonstrated knowledge of AWS best practices.

AWS TRAINING

As a leading Amazon Web Services (AWS) Authorised Training partner in Europe, the Middle East and Africa (EMEA), we help individuals delivering cloud-based solutions gain proficiency with AWS services and solutions.

Our hands-on, role-based training courses are designed around the three primary roles that comprise engineering teams delivering cloud-based solutions: solutions architect, sysops administrator and developer. AWS training is for anyone who wants to gain a deeper level of understanding of Amazon Web Services. Whether you are new or have experience working with AWS, we have a course for you.

GET AWS CERTIFIED!

AWS Certifications recognise IT professionals that possess the skills and technical knowledge necessary for designing, deploying, and managing applications on the AWS platform.

Earning a certification helps you gain visibility and credibility for your proven experience working with AWS, as well as contributes to your organisation's proficiency with AWS-based applications.

JOB ROLE-BASED CERTIFICATIONS

The AWS role-based certifications validate expertise in the following specific roles:

- Cloud Practitioner**
 This certification path is intended for individuals who are looking to build and validate overall understanding of the AWS Cloud. This path is useful for individuals in technical, managerial, sales, purchasing, or financial roles who work with the AWS Cloud.
- Solutions Architect**
 These paths are designed for solutions architects, solution design engineers, and anyone who wants to learn how to design applications and systems on AWS.

- Developer**
 These certification paths are designed for software developers who want to learn how to develop cloud applications on AWS.
- DevOps Engineer / SysOps Administrator**
 These paths are designed for sysops administrators, systems administrators, and those in a DevOps role who want to learn how to create automatable and repeatable deployments of applications, networks, and systems on the AWS platform.

SPECIALTY CERTIFICATIONS

The AWS specialty certifications validate advanced skills in the following specific technical areas:

- Big Data
- Advanced Networking
- Security
- Machine Learning

PLAN YOUR TRAINING

CLASSROOM LIVE

Our expert instructors and hands-on labs provide results-oriented, classroom training. We offer public dates at a wide variety of locations. Courses are run by experienced practitioners and many of them lead to external qualifications for delegates.

VIRTUAL CLASSROOM LIVE

Get engaging and impactful live, instructor-led training, regardless of your location. Our Virtual Classroom Live training combines premium learning technologies and our industry-leading instructors, content, exercises and peer collaboration to ensure that you get the highest quality professional development experience possible.

PRIVATE COMPANY TRAINING

Increase your team's efficiency in a private, coordinated professional development session at the location of your choice. Whether your team attends in a virtual classroom, on-site at your company, or wherever you like, team members will receive expert instruction and curriculum tailored to fit your training requirements.

HAVE MORE COMPLEX NEEDS?

Our learning specialists will work with you to pinpoint your unique specifications and quickly create a targeted, customised solution that meets your budget and schedule.

Whether instructor-led or self-paced, in our classroom, at your company or online, our convenient delivery formats enable you and your team to get the training you need, where, when and how you want it.

TECHNOLOGY DOES NOT STOP. NEITHER CAN YOU.

You closed a skills gap today. But what about tomorrow? In IT, skill-building should be continuous. You have to keep running to keep pace with technological changes, and you do that through continuous learning. Continuous learning is your ally in this constant evolution. And that's the fun of IT, right?

Cloud computing and Amazon Web Services-cloud are being embraced around the world. Because of this organisations are looking for ways to identify individuals with demonstrated knowledge of AWS best practices. AWS training by Global Knowledge helps anyone gain a deeper level of understanding of AWS.
