"We are delighted to be selected as a Brocade Training Provider, and we're pleased to support Brocade in accelerating the growth of skills and the adoption of Brocade solutions in the EMEA marketplace.

With our footprint of training centres and our industry leading virtual classroom solutions, we are able to bring authorised Brocade training to the widest possible audience in this theatre."

Peter Howell
Global Knowledge EMEA Operations Director

Brocade is an industry-leader in providing comprehensive network solutions that help the world's leading organisations transition smoothly to a virtualised world where applications and information reside anywhere.

As a result, Brocade facilitates strategic business objectives such as consolidation, network convergence, virtualisation, and cloud computing. Today, Brocade solutions are used in over 90 percent of Global 1000 data centers as well as in enterprise LANs and the largest service provider networks.

Brocade Authorised Training Partner

Global Knowledge, the world's leading IT, Best Practice and Business Skills training provider, and Brocade have partnered to deliver Brocade certified instructor-led training, covering Europe, the Middle East and Africa. With this partnership in place, a complete portfolio of SAN, IP Network, and Ethernet Fabric courses is available in more languages and in more locations than ever before.

Brocade
Authorized Training Partner

Furthermore, these high quality Brocade training courses are available through a suite of delivery formats, such as classroom training (public and on-site) and award winning virtual learning (with access to live classroom learning). We can also provide a tailored programme to help you train your entire team or organisation.

These learning solutions help you to gain in-depth knowledge of Brocade products, optimise your Brocade-based IT infrastructure and solve critical business challenges using Brocade technology. As a Brocade Authorised Training Partner (ATP), Global Knowledge's qualified instructors deliver Brocade courses in a format that best suit your learning needs, while helping you to maximise the value of your Brocade investments.

Why Get A Brocade Certification?

Customer Value

A Brocade Certification establishes an industry-wide recognition of your technical skills. Candidates will become a part of an elite group of highly sought after professionals. Confidence in your skills will grow by learning and validating relevant cutting edge content. You will be able to innovate, simplify your infrastructure, and design solutions that employ best practices, which can lead to a more prominent role within an organisation.

Your credibility is immediately established as you raise your personal bar. A certified candidate will have a reduced need for assistance or technical support.

Employer Value

Certification provides a direct return on your training investment because it validates the skill levels of employees. It also helps to define professional development areas and skill sets with the SAN and IP networking staff.

Employers will be able to establish a skills matrix and build a roadmap for future training needs. Brocade Certification increases credibility for internal and external customers from managers and peers. Certified individuals will know how to get the most from Brocade products, and design innovative solutions.

Brocade Certification Programme

Brocade has a broad and deep certification programme that focuses on validating skills sets in specific areas and granting credentials. The Brocade Certification Programme enables anyone to demonstrate expertise and gain formal recognition in implementing industry-leading network technology used in data centers through Brocade-authorised training, and then passing the appropriate exam. The credential could be for a particular topic, or a complete set that demonstrates mastery of a focused skill set called a track.

The Brocade Certification Programme is larger, deeper, and now more widely recognised than ever before and open to anyone seeking validation of their networking skills whether it is SAN, IP, Ethernet fabrics or FICON, and wishing to have a competitive technological edge.

A validated set of skills leads to a better understanding of the use and maintenance of Brocade products and is useful when seeking any career advancement.

Brocade provides levels of certification to suit both organisational and individual career goals. The certifications provide an objective measurement of technical proficiency for selling and supporting network solutions, as well as increasing customer satisfaction.

Delivery Formats

Choose when and how you want your learning

We offer a range of learning delivery formats to match your requirements, location and budget and happy to advise on how a series of courses can be combined and delivered over a period of time to provide a programme which meets your requirements.

Classroom - Public Training Schedule and Private Company Training

Our expert instructors and hands-on labs provide results-oriented, classroom training. We offer public dates at a wide variety of locations. Courses are run by experienced practitioners and many of them lead to external qualifications for delegates. If a public training schedule course is not available, we will work with you to provide a Private Company Training alternative, at a Global Knowledge office or at your location.

We also provide webinars, videos and focused classroom (instructor-led) workshops to complement and support our learning programmes.

Alternative delivery formats

We accept that skilled, motivated employees work more effectively, and thanks to the dawn of flexible and non classroom-based learning, there are more options than ever before. e-Learning has a role, particularly for a theoretical learner, but it is often required to be part of a blended or collaborative activity with access to mentors, learning resources and hands-on development whilst engaging media and social networking.

At Global Knowledge we offer a range of flexible delivery formats to help you choose when and how you want your learning.

Virtual Classroom Live

Anywhere, anytime, almost any technology or business training topic, taught by expert instructors, the Global Knowledge Virtual Classroom Live learning experience is unlike anything you've seen before. We've been working diligently for years to bring you an amazing and exciting virtual learning experience. Everything we do is designed to help further careers and help business teams succeed and grow.

V&C Select™ (Virtual learning & Classroom learning)

V&C Select™ is a simple concept and a flexible approach to delivery. You can 'select' a course from our robust public training schedule and attend in person or as a virtual delegate - the choice is yours!

Class-Connect™ HD

Our Class-Connect™ HD is live, hands-on interactive learning where you can attend a course from different training centres. This premium experience uses HD quality audio and video that connects the classrooms over a high capacity managed network to ensure a 'real time' experience. The instructor will be presenting from one location and students attending from other centres are able to interact with the instructor and other delegates using video and voice conferencing.

Learning On-Demand

We offer interactive self-paced content that provides flexibility in terms of pace, place and time to suit individuals and organisations. These resources also consist of online books, educational podcasts and vodcasts, and video-based learning.

Community Learning Portals

Our Community Learning Portals provides access to a range of learning resources including forums and blogs to deliver learning programmes whilst creating communities of practice and communities of learners. Knowledge is captured and shared across the organisation, making best practice (specific to the organisation) available and accessible.

Blended Learning

Many organisations are seeking a blended approach to learning, one that provides flexibility and choice around instructor-led (classroom-based), e-learning or combinations that optimise your planned learning programme.

We're happy to advise you on how a series of courses can be combined and delivered over a period of time to provide a learning programme that meets your business needs.
