## CERTIFICATION TRACK

### Next Level Cisco Certification

At Cisco Live in San Diego, Cisco announced new certification and training tracks, calling it the evolution of networking technology. The driving force behind this change is to unleash the full capabilities of the new network. New skills are required for both network engineers and software developers as networks become more intuitive, automated and intent based.

Updates include:

- Consolidated and updated CCNA training and certification.
- Five core technology tracks and associated training for CCNP and CCIE certifications.
- A wide array of training options for CCNP concentrations and Specialist certifications.
- Continuing education extended to the CCNA and CCNP Certification levels as well as the new Specialist level Certifications.
- First-of-its kind DevNet training with associate, specialist and professional certifications.
